

CENTRAL CAR CLEANING SYSTEM 8.5 (86.500)

| | | | |
|--------------------------------------|-------|---|-----------------------|
| Mains voltage (V) | 400 | Filter area (m ²) | 16 |
| Nominal power (kW) | 8.5 | Number of filter elements (units) | 1 |
| Nominal current (A) | 18.2 | Filter cleaning | Jet pulse |
| Mains frequency (Hz) | 50 | Weight (kg) | approx. 840 |
| Circuit breaker (A) | C32A | Collecting container (Litres) | 200 |
| Intake port (mm) | 160 | Dimensions (L x W x H) (mm) | 1,120 x 2,300 x 2,450 |
| Max. vacuum (Pa) | 19000 | Compressed air requirement at 6 bar (l/min) | 52 |
| Max. volume flow (m ³ /h) | 800 | Compressed air connection (inch) | 3/8" |
| Sound pressure level LpA (dBA) | 75 | Max. number of suction points (units) | 8 |

ESTA PLUS

Area of application:

- Car interior cleaning
- Multi-station suction for up to 8 suction hoses

The benefits to you at a glance

- Very low maintenance requirements due to cyclone separation and fully automatic cleaning of the filter cartridge.
- High suction power thanks to a high-performance side channel compressor
- Ready for use immediately, quick and easy installation
- Low operating noise
- Low follow-on costs since only one filter cartridge is required
- High energy efficiency thanks to power-controlled operation via sensor transmitter and frequency inverter

Special feature:

- The cleaning system combines a filter unit, side channel compressor, and controls in a single compact unit
- All systems integrated in weatherproof housing with sound insulation.
- Fully automatic device and filter cleaning control
- Ideal addition to any car wash - whether new build or replacing existing stand-alone extractors
- Dust-free dirt extraction thanks to mobile collection container with inlaid plastic bag
- Flap valve for connecting a suction hose up to \varnothing 50 mm

State of the art: 86500-07-02 Subject to technical changes! ESTA experts will be happy to help if you have any questions.
